What is the Metaverse for KLM?

- Not just what Meta Horizon or Microsoft Mesh is offering
- 3D Internet, bridging KLM's digital and physical worlds

“The great thing about VR is its ability to make learning experiential. When you watch a module through the headset, your brain feels like you actually experienced a situation. We’ve also seen that VR training boosts confidence and retention while improving test scores 10 to 15 percent – even those associates who simply watched others experience the training saw the same retention boosts.”

- Andy Trainor, Walmart’s senior director of Walmart U.S. Academies

VECTRE

It follows TenneT’s fundamental approach to communications, namely “From monologue to dialogue” and “From the complex to the simple”. It brings the whole world of energy to life for visitors in a fascinating, vivid way.
